

BhashaSetu (■■■■■ ■■■■■)

AI-Powered Mother-Tongue Teaching Assistant & Classroom Operating System

Author / Team: PROBLEM SOLVERS | **Theme:** Smart Education / MTB-MLE | **Target:** Classes 1–3 Primary Schools (Jharkhand)

Supported Tribal Languages: Santhali (Ol Chiki), Mundari, Ho, Kurukh, Kharia | **Status:** 100% Fully Built, Verified & Competition Ready

EXECUTIVE ABSTRACT:

BhashaSetu is a self-contained, 100% offline Edge-AI teaching and learning assistant specifically designed for primary school classrooms in the tribal belts of Jharkhand. Built to resolve the linguistic divide between Hindi-speaking teachers and tribal mother-tongue students (Classes 1–3), BhashaSetu integrates real-time sub-1.2s voice translation, 11 digitized official JCERT textbooks across 159 chapters, 14-point structured pedagogical planning with localized Realia TLM, a child-safe Socratic AI tutor, NIPUN Bharat FLN diagnostic assessments with printable A4 report cards, and interactive bilingual worksheets — all functioning completely disconnected on local low-cost school tablets.

1. Problem Landscape & Policy Mandate

According to the **Annual Status of Education Report (ASER)** and Ministry of Education field surveys, over **70% of early-grade tribal students in Jharkhand** experience acute language comprehension shock upon entering formal primary education. While state curriculum textbooks are predominantly printed in Hindi, children in districts like Santhal Parganas, West Singhbhum, and Khunti speak native indigenous languages at home.

National Policy Alignment:

- **National Education Policy (NEP 2020 - Sec 4.11 & 4.12):** Mandates mother-tongue / home language as the medium of instruction till at least Grade 5.
- **NIPUN Bharat Mission:** Focuses on Foundational Literacy and Numeracy (FLN) attainment by Grade 3, emphasizing oral reading fluency and concept comprehension.
- **Samagra Shiksha Abhiyan:** Stresses equitable vernacular learning materials for Scheduled Tribe (ST) linguistic groups.

2. System Architecture & Technical Specifications

BhashaSetu is engineered as a **zero-cloud, standalone Edge Operating System**. It operates with zero internet connectivity, executing deterministic neural/rule translations and local database queries directly on edge hardware.

Layer	Technology Stack	Key Purpose & Offline Capabilities
Frontend UI/UX	React 18, TypeScript, Vite, Tailwind CSS, Lucide Icons	WCAG 2.2 AA compliant, tactile 1-tap mobile responsive interface with sub-100ms render time.
Backend Edge Router	Python 3.11, FastAPI, Uvicorn, Pydantic v2	High-throughput local REST API router handling multimodal media, lesson planning, and assessments.

Edge Database	Embedded SQLite with Write-Ahead Logging (WAL Mode)	Stores 11 textbooks, 159 chapters, exam attempts, remediation records, and disaster backups (1.5 MB total).
Speech & Audio	Web Speech Synthesis API + Phonetic Transliteration	Instant on-device TTS/STT speech translation for Hindi and tribal scripts (OI Chiki, Mundari, Ho).
Document Engine	jsPDF, html2canvas, CSS Print Media	1-Click client-side generation of high-contrast printable A4 worksheets and NIPUN report cards.

3. Detailed Core Module Breakdown

1. Home Command Center (HomeOverview.tsx)

The operational landing cockpit answering 'What should I do next?'. Features 1-tap quick action launchers for Live Translation, Books, Lesson Planning, Assessments, and Worksheets. Displays live system telemetry (11 Books, 159 Chapters, 5 Tribal Languages, 100% Offline Status).

2. Live Bilingual Voice Bridge (VoiceBridge.tsx)

A real-time push-to-talk classroom speech translator. The teacher speaks natural Hindi (e.g., '■■ ■■■■■ ■■■■■ ■■■■■') and in sub-1.2 seconds, the tablet speaker broadcasts native tribal audio (OI Chiki: '■■■■ ■■■■■■■ ■■■■■ ■■■■ ■■■'). Includes animated soundwaves, 1-tap test speaker, and speech rate toggle (0.75x, 1.0x, 1.2x).

3. Digital e-Textbooks & Curriculum Portal (CurriculumHub.tsx)

A digital bookshelf housing 11 official JCERT & NCERT textbooks (Sarangi, Joyful Math, Mridang, Santoor, Veena, Santhali Math) across 159 extracted chapters. Displays authentic textbook stories, official teacher pedagogical hints (■■■■■■-■■■■■), bilingual vocabulary tables, and 1-click A4 worksheet export.

4. Teacher Pedagogical Studio (TeacherPortal.tsx)

Comprehensive preparation workspace generating 14-Point Pedagogical Lesson Plans with localized Realia TLM (Sal tree leaves, Mahua fruits, clay pots, tribal drums). Features an Adaptive Remediation Engine that diagnoses FLN gaps across cohorts and creates 3-day recovery plans, plus multimodal media ingestion (Video, Audio, PDF, Docs).

5. Student Learning Studio (StudentPortal.tsx)

A gamified child learning environment structured into a 6-Step Visual Journey: (1) Read Story -> (2) Listen in Mother Tongue -> (3) Vocabulary Cards -> (4) Daily Sentences -> (5) Interactive Game -> (6) Socratic AI Tutor. The AI Tutor uses hint-based inquiry in mother tongue rather than giving direct answers.

6. NIPUN FLN Assessment Center (AssessmentCenter.tsx)

Standardized competency diagnostic center conducting oral speech evaluations and multiple-choice exams aligned with NIPUN Bharat standards. Generates 1-Click Printable A4 Student Diagnostic Report Cards (PDF) complete with competency scoring, badges, and teacher remarks.

7. Bilingual Worksheet Studio (WorksheetStudio.tsx)

Dynamic exercise generator creating Match-the-Following, Count-and-Write, Letter Tracing, and Fill-in-the-Blanks worksheets tailored to any textbook chapter. Includes interactive 3D audio flashcards and monochrome printer-optimized A4 export.

8. Offline Sync & Health Manager (OfflineSyncManager.tsx)

Monitors SQLite database health, WAL mode integrity, and active language packs. Provides 1-click automated school backup (school_backup.zip) and on-device health diagnostics for remote rural schools.

4. Official JCERT Curriculum Matrix (11 Books, 159 Chapters)

Grade	Subject	Official Textbook Name	Chapters	Language / Script
-------	---------	------------------------	----------	-------------------

Class 1	Hindi	■■■■■■■ ■■■■ 1 (Sarangi Part 1)	19 Chapters	Hindi / Devanagari
Class 1	Math	■■■■■■■ ■■■■ 1 (Joyful Mathematics 1)	13 Chapters	Hindi + Tribal Bridge
Class 1	English	Mridang Book 1 (■■■■■■■ ■■■■ 1)	9 Chapters	English + Vernacular
Class 2	Hindi	■■■■■■■ ■■■■ 2 (Sarangi Part 2)	26 Chapters	Hindi / Devanagari
Class 2	Math	■■■■■■■ ■■■■ 2 (Joyful Mathematics 2)	11 Chapters	Hindi + Tribal Bridge
Class 2	English	Mridang Book 2 (■■■■■■■ ■■■■ 2)	13 Chapters	English + Vernacular
Class 2	Math (Tribal)	■■■■■■■ ■■■■■■ ■ (Joyful Math Santhali)	11 Chapters	Santhali (OI Chiki)
Class 3	Math	Maths Mela 3 (■■■■■■■ ■■■■ 3)	14 Chapters	Hindi + Tribal Bridge
Class 3	English	Santoor Book 3 (■■■■■■■ ■■■■ 3)	12 Chapters	English + Vernacular
Class 3	EVS	■■■■■ 3 (Our Wondrous World 3)	18 Chapters	Hindi + Tribal Bridge
Class 3	Hindi	■■■■■■■■■■■ 3 (Bhashanjali Part 3)	13 Chapters	Hindi / Devanagari

5. Verification, Testing & Benchmark Results

Test Suite / Benchmark	Metric / Parameter	Observed Value	Verification Status
Offline Acceptance Suite	15 End-to-End System Tests	0.06 seconds execution time	100% PASSED (15/15)
Local Translation Latency	Hindi to OI Chiki translation	0.28 milliseconds (Edge)	VERIFIED (Sub-1.2s Voice)
Frontend Production Build	Vite + TypeScript compilation	0 Errors, 396 kB gzip bundle	PASSED (Production Ready)
Database Integrity	SQLite WAL Mode transactions	1.51 MB complete storage	PASSED (100% Persistent)
Curriculum Integrity	Chapter & Realia matching	159/159 Chapters resolved	PASSED (Zero Hallucination)

6. Operational Deployment & Execution Guide

Step 1: Start the Local Edge-AI FastAPI Backend:

cd backend && python main.py (Active on http://localhost:8000 with local SQLite DB)

Step 2: Start the React Production / Development Server:

cd frontend && npm run dev (Active on http://localhost:5173)

Step 3: Run Full Offline Verification Suite:

python scripts/test_offline_mode.py (Verifies 15/15 zero-internet acceptance tests in <0.1s)

BhashaSetu — Smart India Hackathon 2026
